REASONS FOR ALLOWANCE

The applicant's response filed 10/5/2004 to the Office action has been entered. Claims 9-23, 25-32 and 51-81 are pending.

1. The following is an examiner's statement of reasons for allowance:

Concerning claims 9-23, 25-32, and 51-81, no prior art has been found teaching or suggesting a method for carrying out a chemical or biochemical protocol comprising using at least one mobile sample transport member on which there are a plurality of sample receiving regions, moving the sample transport member through at least one temperature regulated zone upon which a thermal transfer member acts, wherein the thermal transport member cycles between at least two temperatures while the sample receiving regions are moving through the at least one temperature regulated zone.

The closest prior art is the reference of Bach et al. (6,413,780, issued July 2, 2002). Bach et al. disclose that a transport system, such as a conveyor or a carousel is used in streamline connected with multiple structures and the structure will be used for DNA/RNA sample preparation and amplification (See column 4, lines 1-13). Bach et al. do not disclose the transport system is continuously moving through at least one temperature regulated zone upon which a thermal transfer member acts, wherein the thermal transport member cycles between at least two temperatures while the sample receiving regions are moving through the at least one temperature regulated zone.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
